

## Disclaimer on products that are designated as “Cosmetics Grade”, e.g. Baycusan®

Covestro products that are designated as “Cosmetics Grade”, e.g. Baycusan®, meet certain biocompatibility test requirements (available upon request) for skin contact.

Covestro Products designated as “Cosmetics Grade” shall not be considered candidates for any Medical Applications or food and drinking water applications, unless Covestro explicitly agrees, in writing, to sell such products for such application.

The biocompatibility testing referenced above cannot assure the biocompatibility of final or intermediate products made from Covestro Products or the suitability of such products for their use in a Cosmetics Application, i.e., the test data cannot be used to conclude that any cosmetic devices manufactured from the Covestro Products meet the necessary requirements. It is the sole responsibility of the manufacturer of final end-use product to conduct all necessary tests (including biocompatibility tests) and inspections and to evaluate the final product under actual end-use requirements.

The designation as “Cosmetics Grade” does not mean that Covestro or anyone else has determined that the product is suitable for use in any particular Cosmetics Application. Covestro makes no representations regarding the suitability of a Covestro Product for a particular Cosmetics Application or final end use product. A determination that the Covestro Product is suitable for use in a particular Cosmetics Application or final end-use product can only be made by the purchaser of the Covestro product who utilizes it in a Cosmetics Application and conducts all necessary testing and evaluation to support such a determination.

Covestro makes no representations or warranty regarding (and accepts no responsibility for determining) either:

- the suitability of a Covestro Product for a particular Cosmetics Application or final end-use product or
- the adequacy of any warning relating to a Covestro Product or particular Cosmetics Application or final end-use product.

The suitability of Covestro Products in a given end-use environment is dependent upon various conditions including, without limitation, chemical compatibility, method of manufacture or temperature.

It is the sole responsibility of the manufacturer of the final end-use product to conduct all necessary tests and inspections and to evaluate the final product under actual end-use requirements and to adequately advise and warn purchasers and users of pertinent risks and fulfill any postmarket surveillance obligations.
