

High performance enabled by nature:
First partially bio-based crosslinker.

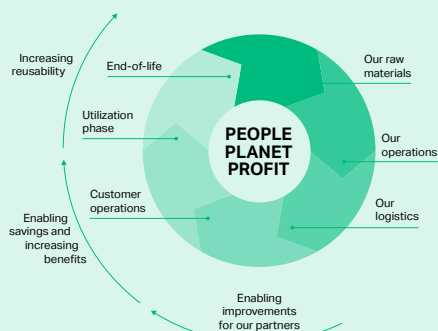

Desmodur® CQ

Desmodur® CQ ultra N 7300. High performance enabled by nature: First partially bio-based crosslinker

Sustainability – lifecycle thinking

Covestro pursues a holistic approach and views value creation cycles in their entirety – with sustainability in mind at all times.

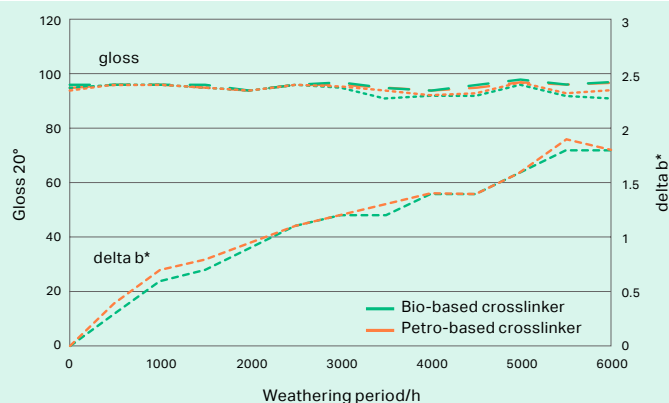

Sustainability has an increasing impact on the product and raw material purchasing decisions of customers, brand owners and consumers.

Although several partially bio-based polyol solutions have existed, up to now the limiting factor in developing partially bio-based polyurethanes has been the need for polyurethane crosslinkers based on renewable feedstock.

Covestro has solved another part of the puzzle of how to develop more sustainable polyurethanes with the release of **Desmodur® CQ ultra N 7300**. This is a new near zero VOC aliphatic polyisocyanate, and the first polyurethane crosslinker on the market with a significant renewable content that has not come at the expense of performance*.

Gloss and yellowing during weathering referring to SAE J 2527 in auto OEM formulation

Product specifications

~ 21.5% NCO

~ 9500 mPa · s at 23°C

< 0.1% PDI monomer

70% renewable content**

< 100 Hazen

Key benefits of Desmodur® CQ ultra N 7300:

- 70% renewable carbon content** derived from non-fossil-based inputs, with no direct competition with the food chain
- Significantly reduces the cradle-to-gate carbon footprint in comparison to HDI derivatives
- Trimer based on a new aliphatic isocyanate pentamethylene diisocyanate (PDI), a new innovation in polyurethane chemistry, as it is the first diisocyanate in 30 years to be fully developed and scaled-up
- Near drop-in for hexamethylene diisocyanate (HDI)-based trimers, i.e., reformulation requirement low
- Same high-performance standards as HDI derivatives
- Broader formulation flexibility than HDI-based products due to superior compatibility

Applications:

Coatings, adhesives and much more – you can potentially use **Desmodur® CQ ultra N 7300** wherever HDI trimers are used.

* Commercially available in Europe.

** Value based on theoretical calculation (68 ± 4% renewable carbon, 14C measurement according to ASTM-D6866 standard).

The manner in which you use our products, technical assistance and information (whether verbal, written or by way of production evaluations), including any suggested formulations and recommendations, is beyond our control. Therefore, it is imperative that you test our products to determine suitability for your processing and intended uses. Your analysis must at least include testing to determine suitability from a technical, health, safety, and environmental and regulatory standpoint. Such testing has not necessarily been done by Covestro, and Covestro has not obtained any approvals or licenses for a particular use or application of the product, unless explicitly stated otherwise. [EMEA only: If the intended use of the product is for the manufacture of a pharmaceutical/ medicinal product, medical device¹ or of pre-cursor products for medical devices or for other specifically regulated applications which lead or may lead to a regulatory obligation of Covestro, Covestro must explicitly agree to such application before the sale.] Any samples provided by Covestro are for testing purposes only and not for commercial use. Unless we otherwise agree in writing, all products are sold strictly pursuant to the terms of our standard conditions of sale which are available upon request. All information, including technical assistance is given without warranty or guarantee and is subject to change without notice. It is expressly understood and agreed by you that you assume and hereby expressly release and indemnify us and hold us harmless from all liability, in tort, contract or otherwise, incurred in connection with the use of our products, technical assistance, and information. Any statement or recommendation not contained herein is unauthorized and shall not bind us. Nothing herein shall be construed as a recommendation to use any product in conflict with any claim of any patent relative to any material or its use. No license is implied or in fact granted under the claims of any patent. These values are typical values only. Unless explicitly agreed in written form, they do not constitute a binding material specification or warranted values.
