

Architectural & Construction

We've got you covered

Today, we spend most of our time inside buildings – but how do we look after the materials and structures that keep us **warm, dry, and safe?**

At Covestro, we're committed to creating solutions that protect both these environments, and our collective environment, the earth. With solutions for a wide range of substrates and applications, we've got you covered.

With an ever-growing world population and major ecological challenges, all architectural and construction players will need to make a joint effort to shape the sector's future. And to go from status quo to the Status Next of tomorrow, we have to think big. At Covestro, we can help you make this future a reality with our innovative coatings and adhesives technologies.

From constructive work to bespoke coating solutions...

Our solutions combine durability, aesthetic appeal, safety, and future-proofing greater sustainability. They can withstand the harshest outdoor conditions and interior wear and tear. They're designed to be easy and efficient for applicators and end-users to work with, and to deliver enhanced functional properties. And they're developed with today's evolving sustainability and safety regulations in mind.

For tomorrow, we aim to drive next-level architectural and construction elements, enabling even stronger, more functional, more beautiful interiors and exteriors for homes, businesses, and public spaces. Increased efficiency, smart concepts, tailored offerings, and more circular coating solutions will provide our building blocks for a brighter future.

...We've got you covered.

With an extensive range of products to choose from, we're sure there's something for you. Our solutions can cover wood, stone, metal, concrete, plastics, plasters, and more. They include primers, sealers, adhesives, and topcoats, and both hybrid and tribrid technologies. And all these products can enrich interiors or exteriors, flooring or wall paints, metal coatings or furniture lacquers.

What's more, as one of the front-runners in technologies such as partly bio-based resins, we also provide more environmentally friendly options to keep you covered for the future. And, with our total-solutions approach, we can work with you to develop differentiating, futureproof solutions that address your customers' evolving demands. Day and night, we've got you covered.

Say hello to more futureproof applications

From partly plant-based wall paint resins to productivity-boosting floor coating solutions, our solutions go beyond the status quo to help you achieve next-level circularity, productivity, and regulatory compliance.

Driving circularity with plant-based ingredients

As the effects of climate change become more severe, circularity and sustainability are becoming increasingly important in coatings. At Covestro, we aim to develop materials for architectural and construction applications with circularity at their core.

For instance, our Decovery® resins for interior and exterior wall and floor coatings contain up to 52% plant-based content. And it's our Next goal to enable structures and interior elements that embed circular design throughout, driven by fruitful partnerships.

Powering productivity with innovative technologies

In an increasingly fast-paced world, productivity is more important than ever. And to efficiently produce materials for powerful architectural and construction applications, you need the right raw materials.

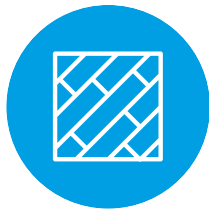

We have extensive experience providing materials to enable faster, easier production. For example, our Pasquick® floor-coating solutions can save time and money through reduced coating layers, faster curing, and a longer pot life. And our Next solutions go even further, considering the whole architectural and construction market to meet your application's specific needs.

Keeping you ahead of the regulatory curve

Regulations around sustainability, safety, and health are always evolving. We can help you keep pace with solutions that not only meet, but exceed, these standards. Combined with technical expertise you can rely on, this means you can always stay one step ahead of the game.

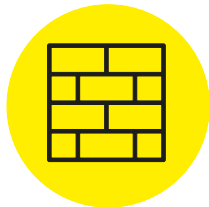

With all these solutions, we really have got you covered

Wood

Durable, long-lasting solutions for interior and exterior wood, including flooring, decks, façades, and decorative trim.

Walls

Long-lasting, fast-drying, easy-to-clean finishes for interior and exterior walls.

Concrete and waterproofing

Reliable, long-term protection and waterproofing for concrete, from balconies and patios to industrial environments.

Adhesives and sealants

High-performance materials to help optimize your production process and improve the sustainability of your products.

...and more!

We're always looking to support innovation in emerging architectural and construction sub-segments.
