

Desmophen® CQ NH

Desmophen® CQ NH

Aspartics combining proven performance
with partly bio-based content

Partly bio-based aspartics for construction and industrial applications

Sustainability requirements are tightening for a wide range of construction and industrial applications, such as floor coatings, industrial metal coatings, and wind turbine coatings. To help you meet these requirements, we are increasingly introducing partly bio-based coating raw materials to the industry.

As part of this transition, we will be offering **Desmophen® CQ NH**: a portfolio of aspartics that all contain at least 25% bio-based content, which are part of our **Pasquick®** fast-curing coating technology.

Partly bio-based aspartics with no change in technical performance

With this alternative raw material share, **Desmophen® CQ NH** can help you meet end-user requirements for increased circularity. And we've ensured that **Desmophen® CQ NH** retains the same proven performance as its predecessors. So you can prepare for future sustainability requirements while continuing to meet your end-users' needs.

Curious?

Find out more on our Solution Center:

To get additional circularity improvements from **Pasquick®** technology, you can also combine **Desmophen® CQ NH** with other partly bio-based products such as our **Desmodur® CQ** aliphatic polyisocyanates.

Key benefits of Desmophen® CQ NH:

- Boosts coating productivity
- Partly bio-based content
- LF grades available for improved industrial hygiene
- Comparable performance to predecessors

Pasquick® at a glance:

- Time and cost savings thanks to fast-cure technology and reduced coating layers
- Strong protection against corrosion, weathering, and mechanical impact
- Ultra-high solids; up to near-zero VOCs possible
- Proven performance over 20 years
- Full-system solution portfolio: **Desmodur®** polyisocyanates and **Desmophen® CQ NH** aspartics

The manner in which you use our products, technical assistance and information (whether verbal, written or by way of production evaluations), including any suggested formulations and recommendations, are beyond our control. Therefore, it is imperative that you test our products to determine suitability for your processing and intended uses. Your analysis must at least include testing to determine suitability from a technical, health, safety, and environmental and regulatory standpoint. Such testing has not necessarily been done by Covestro, and Covestro has not obtained any approvals or licenses for a particular use or application of the product, unless explicitly stated otherwise. [EMEA only: If the intended use of the product is for the manufacture of a pharmaceutical/ medicinal product, medical device¹ or of pre-cursor products for medical devices or for other specifically regulated applications which leads or may lead to a regulatory obligation of Covestro, Covestro must explicitly agree to such application before the sale]. Any samples provided by Covestro are for testing purposes only and not for commercial use. Unless we otherwise agree in writing, all products are sold strictly pursuant to the terms of our standard conditions of sale which are available upon request. All information, including technical assistance is given without warranty or guarantee and is subject to change without notice. It is expressly understood and agreed by you that you assume and hereby expressly release and indemnify us and hold us harmless from all liability, in tort, contract or otherwise, incurred in connection with the use of our products, technical assistance, and information. Any statement or recommendation not contained herein is unauthorized and shall not bind us. Nothing herein shall be construed as a recommendation to use any product in conflict with any claim of any patent relative to any material or its use. No license is implied or in fact granted under the claims of any patent. These values are typical values only. Unless explicitly agreed in written form, they do not constitute a binding material specification or warranted values.
