High performance enabled by nature: New partially bio-based polyurethane dispersions for textile coatings

Increasingly, sustainability is affecting the product and raw material purchasing decisions of customers, brand owners, and consumers. Biomass is already the raw material basis for around 10% of all chemical products. New technologies, cooperative agreements and product developments will enable the textile coating industry to move forward in using more products based on renewable resources.

Covestro has developed a technology to raise the content of renewable resources in polyurethane dispersions (PUDs) to 56%. This makes new levels of sustainability possible for PU-coated textile materials. Thanks to this development, it is now possible for manufacturers to produce coated fabrics with a low content of fossil-based raw materials.

These partially bio-based products offer the same level of properties as products based on traditional raw materials.

Key benefits of Impranil® eco PUDs:

- 38%–56% renewable carbon content derived from non-fossil-based inputs.

Impranil®	eco DL519 Top coat	eco DLS/1 Intermediate	ecoDL1878 Tie coat
Renewable content (% solid*)	approx. 38%	approx. 50%	approx. 56%

- Good light fastness, excellent resistance to abrasion.
- Superior perceptual quality.
- More environmentally friendly.
- Better water and energy utilization during production.
- Suitable to be used for a variety of textile coating applications.

*% renewable carbon, 14C measurement according to ASTM-D6866 standard

The manner in which you use our products, technical assistance and information (whether verbal, written or by way of production evaluations), including any suggested formulations and recommendations, is beyond our control. Therefore, it is imperative that you test our products to determine suitability for your processing and intended uses. Your analysis must at least include testing to determine suitability from a technical, health, safety, and environmental and regulatory standpoint. Such testing has not necessarily been done by Covestro, and Covestro has not obtained any approvals or licenses for a particular use or application of the product, unless explicitly stated otherwise. [EMEA only: If the intended use of the product is for the manufacture of a pharmaceutical/ medicinal product, medical device¹ or of pre-cursor products for medical devices or for other specifically regulated applications which lead or may lead to a regulatory obligation of Covestro, Covestro must explicitly agree to such application before the sale.] Any samples provided by Covestro are for testing purposes only and not for commercial use. Unless we otherwise agree in writing, all products are sold strictly pursuant to the terms of our standard conditions of sale which are available upon request. All information, including technical assistance is given without warranty or guarantee and is subject to change without notice. It is expressly understood and agreed by you that you assume and hereby expressly release and indemnify us and hold us harmless from all liability, in tort, contract or otherwise, incurred in connection with the use of our products, technical assistance, and information. Any statement or recommendation not contained herein is unauthorized and shall not bind us. Nothing herein shall be construed as a recommendation to use any product in conflict with any claim of any patent relative to any material or its use. No license is implied or in fact granted under the claims of any patent. ¹Please see the "Guidance on Use of Covestro Products in a Medical Application" document.
