

Statement on Regulation (EU) 2024/573 on Fluorinated Greenhouse Gases

The objective of Regulation (EU) 2024/573 is to protect the environment by reducing emissions of fluorinated greenhouse gases.

Three main regulatory approaches aim to reduce fluorinated greenhouse gas emissions:

1. Introduction of a gradual phase-down of the quantities of hydrofluorocarbons (HFCs) available on the market to one-fifth of current levels by 2030
2. Prohibitions on use and placement on the market, insofar as technically feasible and more climate friendly alternatives are available
3. Continuation and expansion of the scope of regulations concerning leak tests, certification, disposal and labelling

Regulation (EU) 2024/573 applies to:

- (a) the fluorinated greenhouse gases listed in Annexes I, II and III (of Regulation (EU) 2024/573), whether alone or as mixtures; and
- (b) products and equipment, and parts thereof, containing fluorinated greenhouse gases or whose functioning relies upon those gases.

To the best of our knowledge the products of Covestro Deutschland AG and its affiliates seated in member states of the European Union (EU) or the European Free Trade Association (EFTA) do not intentionally contain the following Fluorinated Greenhouse Gases (as listed in Annex I, II and III of Regulation (EU) 2024/573) and therefore these substances are not expected to be present above limit values, if applicable. The presence of analytically detectable traces, which have possibly been introduced via raw materials, auxiliaries and additives, cannot be excluded. Specific analyses to measure such traces have not been performed on raw materials or final products.
